SUMMARY

Full-stack developer with 5+ years of experience building and maintaining scalable web applications. Skilled in JavaScript (React.js / Vue.js / Node.js), PHP (Laravel, Codeigniter, WordPress), and Python (Django, FastAPI) with strong experience in designing RESTful APIs, integrating external systems, and working with both relational databases and MongoDB. Experienced in handling data-intensive and real-time applications, including conversational and AI-driven systems. Adept at Dockerized deployments, CI/CD pipelines, and building reliable, high-performance backend architectures. Passionate about writing clean, maintainable code and delivering robust, production-ready solutions.

SKILLS

Technical: React.js, PHP (Laravel / Codeigniter / Wordpress), Node.js, Python (Django / FastAPI), JavaScript, HTML5, CSS3, Tailwind CSS, Vue.js, RESTful APIs, PostgreSQL, MySQL, MongoDB, Docker, Git, GitLab CI/CD, unit & integration testing (pytest / PHPUnit).

AI & CV: OpenCV, TensorFlow, YOLOv8, basic LLM integrations (sentiment analysis).

Practices: System design & scaling, performance optimization, containerized deployments, automated testing, CI/CD, code review.

Other: Remote & cross-timezone collaboration, English — IELTS 7.5 (C1), problem-solving, Agile.

Currently Exploring: WebSockets/real-time

WORK EXPERIENCE

MadeIndonesia

Jun 2025 - Present

Full-Stack Developer

Yogyakarta

- Developed and customized WordPress themes and plugins for production websites, including landing pages and e-commerce platforms.
- Built responsive frontend interfaces using HTML, CSS, and JavaScript, ensuring performance, usability, and cross-device compatibility.
- Integrated third-party services and APIs to extend website functionality, including forms, analytics, and payment-related features.
- Worked within CI/CD workflows to support streamlined deployment processes and faster release cycles.

GebutDev

Sep 2022 - Jun 2024

Full-Stack Developer

Fully Remote

- Developed and maintained scalable RESTful APIs (Laravel), optimizing DB queries and endpoints for throughput and latency.
- Implemented CI/CD pipelines (GitLab) and containerized builds with Docker to standardize deployments across environments.
- Built frontend features using Vue.js/React and worked closely with product/UX to produce stable full-stack releases.

Informatika UII

Dec 2019 - Sep 2021

Web Developer

Yogyakarta, Indonesia

- Modernized legacy systems using Laravel and CodeIgniter with attention to authentication, data modeling, and security compliance.
- Integrated automated deployment and testing to reduce regressions and speed up release cycles.
- Mentored teammates on backend design principles and database schema creation to reflect business processes.
- Enhanced frontend experience with React and Tailwind CSS to improve usability and accessibility.

Budi Mulia Dua Foundation

Mar 2021 - Aug 2021

Data Engineer

Yogyakarta, Indonesia

- Built ETL pipelines for real-time social media ingestion using Python and Docker; used Kafka-style queuing and async workers for reliability.
- Processed streaming data and integrated simple LLM-based sentiment analysis to provide actionable reports.
- Collaborated with frontend teams to integrate analytics outputs into dashboards for stakeholders.

Laboratorium Terpadu Informatika UII

Aug 2019 - Jul 2021

Laboratory Assistant

Yogyakarta, Indonesia

- Assisted in teaching Application Development (PHP Native, Laravel, and Codeigniter) and Programming & Data Structures (C++ and Python), helping students understand foundational web technologies.

Universitas Islam Indonesia

Aug 2019 - Jan 2021

Lecturer Assistant

Yogyakarta, Indonesia

- Mentored students in Design Thinking (UI/UX Design Figma), fostering practical skills in problem-solving and application design.

PROJECTS

Ball Throwing Game for Physical Activity Enhancement

Jan 2024 - Jan 2025

Computer Vision (YOLOv8)

Yogyakarta, Indonesia

- Developed a real-time interactive game using YOLOv8, OpenCV, and TensorFlow to detect ball throws and gestures.
- Designed low-latency pipelines and optimized detection performance under varied lighting and shadow conditions.
- Integrated computer vision outputs into gameplay logic, creating responsive and engaging user feedback.
- Focused on building a modular AI pipeline that can be extended to more advanced AI/LLM integrations in the future.

Baba Is You Inspired Puzzle Game

Jul 2020 - Sep 2020

Personal Game Project (C#, Unity)

Yogyakarta, Indonesia

- Designed and implemented dynamic rule-based mechanics, applying principles similar to backend logic orchestration.
- Wrote modular, reusable code for puzzle logic to support flexibility and maintainability.
- Focused on user experience and system responsiveness, balancing gameplay flow with underlying game rules.

EDUCATION

Universitas Islam Indonesia

Sep 2018 - Jan 2025

Bachelor of Informatics Engineering

GPA: 3.76

CERTIFICATIONS

IELTS – International English Language Testing System

Dec 2025 - Dec 2027

Achieved an overall Band 7.5 (C1 level) - Listening 7.5, Reading 9.0, Writing 6.5, and Speaking 6.5.

Yogyakarta, Indonesia

CEPT – Certificate of English Proficiency Test

Sep 2024 - Sep 2026

Achieving a Total Score of 614 (B2 Level) - Listening 233, Structure & Written Expression 79, Reading 302.

Yogyakarta, Indonesia

Programming Competition - INFEST Unsyiah

Dec 2019

Semifinalist at Universitas Syiah Kuala

Surakarta, Indonesia

Beasiswa Unggulan - Kemendikbud

Oct 2018

Awardee for Achieving Society Category

Yogyakarta, Indonesia

SSF (Sebelas Maret Statistics Fair)

Nov 2017

Semifinalist at Universitas Sebelas Maret

Surakarta, Indonesia

National Science Olympiad

May 2017

1st Place in Computer Science at City Level

Parepare, Indonesia

VOLUNTEERING & COMMUNITY TEACHING

Community Teacher — Literacy & Numeracy for Special Needs Children (Freelance)

Mar 2019

Literacy & Numeracy for Special Needs Children

Yogyakarta, Indonesia

- Taught basic reading, writing, and arithmetic to a child with special needs through one-on-one sessions.

Tutor - Computational Thinking & Bebras Challenge

Nov 2019

Computational Thinking & Bebras Challenge

Yogyakarta, Indonesia

- Guided student groups in computational thinking training to prepare for the international Bebras Challenge.
